

LITTLE SISTER

(L: Uli `G` Hoffmann, Chief Larsen / M: Uli `Gibson` Hoffmann)

Hey little sister, close your eyes , feel the silence there's no lies
Relieve the burden off your shoulders
Let yourself drift with the wind , god gave you a secret hint
Enter the light, your brand new home

Let bygones be bygones , and consolation comes at once
Follow the signs and don't ask why

Little sister go your own way
Try to find a better world that is worth for you to stay
Life is short and you will see who you are and what you will be
And it's more than you're just prayin' for

Hey little sister, heart of gold , you will get shelter in the cold
Redemption will be brought to you
There's no return, you feel no pain , your old world is sick and lame
But believe me, you're the sacred one

Let bygones be bygones, and consolation comes at once
Follow the signs and don't ask why

Little sister go your own way
Try to find a better world that is worth for you to stay
Life is short and you will see who you are and what you will be
And it's more than you're just prayin' for
